MEMORANDUM FOR: Deputy Director for Science
and Technology

SUBJECT: Possible Reorganization of CIA
Intelligence Production Effort

1. The purpose of this memorandum is to suggest a possible reorganization of the CIA intelligence production effort and indicate the magnitude of personnel shifts involved. The reorganization proposal places military, scientific and technical intelligence within the DD/S&T while leaving a large part of the present DD/I effort where it is.

2. In moving those DD/I efforts of a military, scientific and technical nature to the DD/S&T an organization can be set up wherein related efforts now split between the DD/I and DD/S&T can be combined in one unit. I suggest that the organization would look like this:

DD/S&T

ADD/S&T for
Intelligence Production

Office of
Military
Estimates

Office of
Strategic
Offense and
Space

Office of
Defensive
Weapons and
General Purpose
Forces

Office of
Science and
Technology

25X1

25X1

3. Each office would be formed as follows:

a. The Office of Military Estimates

25X1

25X1

25X1

SUBJECT: Possible Reorganization of CIA
Intelligence Production Effort

b. The Office of Strategic Defense and Space

25X1

c. The Office of Defensive Weapons and General
Purpose Forces

25X1

d. The Office of Science and Technology

25X1

4. The DD/I would then look like this:

DD/I

IRS

New Office
of Political
Estimates

CRS

OBGI

New Office
of Political
Intelligence

Remainder
of OER

This would give the ADD/S&T for Intelligence Production
and the DD/I Perhaps there should be
some further adjustment of slots; however the DD/I (IRS,
CRS, OBGI) can be looked upon as a service of common concern.

DONALD F. CHAMBERLAIN

Director of Scientific Intelligence
